

# Daddi Long Legs

This is a great product to use on surfaces that require regular access, such as silo tops, air conditioning units, and ventilation plant; also for awkward shapes such as streetlights and on boats where fast removal is a key requirement.

The Daddi Long Legs is a spider-shaped circular deterrent that has a freely rotating head with long Stainless Steel wires which bounce in the wind or when a bird comes into contact with it. The device can be screwed in place through the 3 mounting holes, or it can be glued in position using our silicone adhesive. The Daddi Long Legs are available in 1.25m, 1.8m and 2.5 diameters.

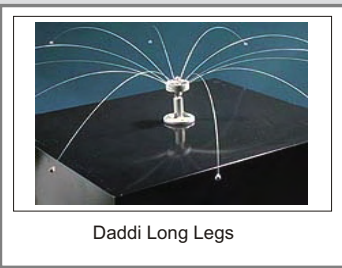

Daddi Long Legs are also ideal for mounting on Flat Roofs. To allow maintenance to be carried out on the roof we recommend attaching the Daddi Long Legs to a paving slab, then positioning the product on the roof. You may require more than one to ensure proper coverage, dependant on the roof size.

We also sell a range of products to help you fix the daddi Long Legs to your boat. These are as follows:

**Boat Rail Clamp** is the perfect answer for stopping pest birds from perching on your boat's railings. Simply attach a Daddi Long Legs to your railing using this clamp.

**Sand Bag Base** is a weighted sandbag which is made of a tough canvass construction. Simply attach the spindle of the Daddi Long Legs to the base. Simple to use, easy and quick to remove.

**Strap on Base** is a flexible, hard wearing boat adaptor to attach your Daddi Long Legs to the boat's boom, A-frame, bimini top frame or radar arch. Easy to secure with a bungee, allowing fast removal.

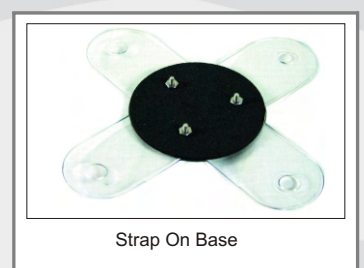

Daddi Long Legs

Boat Rail Clamp
